CAN BE DISMANTLED AND PACKED INTO A CASE FOR CARRYING IN 2 MINUTES.

RECOMMENDED BLANKETS:
ONE QUALITY FRONTING AND
TWO PURE WOOL BLANKETS

Specification

Strength has been the paramount though behind this design. Special features are:

1/2" plate steel side frames

3 1/4" diameter top roller, ground and plated

3 1/4" bottom roller

Solid top bearers to enable adequate pressure through 1/2" adjusting screws

Ball races on both rollers

Grey ridged pvc plank 24 x 12 x 1/4"

Direct drive from handle to bottom roller gives the smooth but necessary feel when maximum pressure is required.
