

DIGITAL PRINTING PRESSES

Here are two new models in digital on-demand full colour printing presses designed for short run printing on to a wide variety of stocks from 55gsm right through to 400 gsm.

Intec CP2000 - On Demand Colour Print Production SRA3 low cost print production for volume on demand printing

The Intec CP2000 is the first of a new generation of on demand digital colour printing presses developed specifically for printing professionals.

The CP2000, offering a new bench mark in printing performance and quality, is designed to replace the need for a traditional litho press. The Intec CP2000 will print on to a wide range of stocks from 55 gsm right through to heavy stock 400 gsm card and at sizes up to 1.2 metres long.

Combine this with a system that comes fully specified as standard, a new low cost per print, and a price that others will not believe - and it all adds up to a complete printing system that will be the envy of your competitors that have spent several times as much with half the capability.

Intec CP2000 PRO - Full colour 400 gsm Printing Press A digital printing press designed for printing professionals

The Intec CP2000 PRO is the latest in a new generation of on demand digital printing presses designed for the professional printer.

The CP2000 PRO offers a whole host of features for the print professional setting a new standard in printing performance. The advanced print management and work flow software combined with the CP2000 PRO's accuracy, quality, colour management and media handling capability leave the competition standing.

Add to the mix the ability to print to a wide range of media in weights from 55 gsm to 400 gsm, a maximum printing format of over SRA3 right through to 1.2 metres, and very competitively priced printing consumables and you have a truly professional on demand digital printing press that will make your competitors green with envy.
