

## HOT PLATE – 60 x 80 cm

Technical data VTL-60x80	centimeters	inches
Size aluminium top	60x80	24"x31"
Height	10	4
Electric power	1500 Watt	
Electric current (Amps) at 230 Volt supply	6.5	
Warming up time	10 minutes	
Weight	20 kg	44 lbs
Size standard packing	65x85x15	26x33x6
Weight, including standard packing	24 kg	53 lbs

The temperature of these hotplates is controlled thermostatically. The table top is made of 5 mm thick aluminium in order to realize an even distribution of the heat. The aluminium table top is totally plane which facilitates cleaning it. Graduations in temperature can be achieved between 30-85°C. The working temperature pendulates around the dial setting by 10°(max.). These hotplates come with a double insulated cord for 230 V. An indicator lamp turns on while the warming element's circuit is open.
