

HUNTERPRESS

HUNTERGEN *HN FILM*
FOR IMAGESETTERS

Red-sensitive film, intended for exposure in recorders with HeNe laser (630 nm) or red laser diode (670 nm).

Emulsion coated on a 0.10 mm (HN and HNm) Polyester base

Features

- ◀ Perfect "hard dot" edge sharpness and practical density even in the small dots
- ◀ Wide System latitude: wide processing and exposure latitude
- ◀ Low dot shift in plate copy
- ◀ Good batch-to-batch consistency
- ◀ Convenience and ease of use because of available ECO equipment
- ◀ Low chemistry consumption
- ◀ Linear output for conventional screening & stochastic screening
- ◀ Anti-static before and after processing
- ◀ Open system :processable in all RA and HD chemistries
