

## PROJECTS COMPLETED

### *Pre-press equipment packages*

In two separate projects in Nigeria and the Gulf, Hunter Penrose have supplied complete pre-press suites based around ECRM Stingray and Agfa Avantra Imagesetters, plus associated equipment, installation, and consumables.

## PRODUCT LAUNCHES

### *Narrow Width Flexo*

Processing equipment and consumables for the narrow width flexo market were launched with two shipments to West Africa. The equipment consists of film processor, photopolymer plate processor, and all consumables.

### *Inks*

We continued to expand our range of inks with the introduction of sheet fed process and Pantone® to complement our already established range of **Hunterpress** Coldset web inks.

### *Varnishes*

A top quality range of oil based overprint varnishes has been added. Our OPV (Overprint Varnishes) can be formulated to provide the required level of gloss and slip on all kinds of paper and board.

### *Silicone Emulsions*

We now supply 35% and 60% antistatic silicone emulsion for heatset web coating.

### *Film and Plates*

We re-launched our **Hunterpos** and **Hunterneg** brand to complement the KPG brand already established.

### *K490 Blanket*

Our **Impress K490** Metal Printing Blanket was successfully launched in January on 3 continents. This high quality non-compressible blanket fulfils all expectations of professional printers on Crabtree and Mailänder presses.

### *PP Crystal Clear Tape*

“Water-Clear” quality makes this non-yellowing montage tape clearly superior to other types in Europe and Middle East.

### *Stitching Wire*

Hunter Penrose will continue to expand the range of finishing products. Already available is our competitively priced round galvanised stitching wire. More products for cutting, creasing, adhesives and other print finishing processes will follow.
